Year 5

Calculation policy
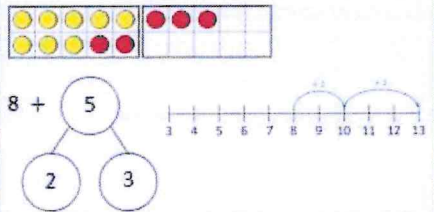

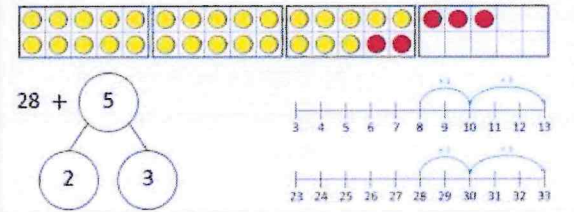

Updated September 2024

White Rose
MATHS

Guidance for teachers

The calculation policy is divided into four sections: addition, subtraction, multiplication and division. At the start of each section, you will find an overview of the progression of skills. Calculations involving decimal numbers and fractions are included.

The calculation policy follows the same concrete, pictorial, abstract approach as our main schemes of learning. Where appropriate, sentence stems and key questions are included alongside the key representations.

Where skills are divided into more than one section across the page, there is a progression in the level of difficulty from left to right.
For example, when adding across a 10, children need to be able to add across 10 itself, before making links with related facts.

| Add across a 10	... can be partitioned into ... and ...	I add ... to get to ... then I add ... $8 + 5 = 13$ $28 + 5 = 33$
Partition the number you are adding to make a full ten.	$8 + \overset{5}{\underset{2 \quad 3}{\bigcirc}}$	$28 + \overset{5}{\underset{2 \quad 3}{\bigcirc}}$

Progression of skills – Addition

Year 4	Year 5	Year 6
• Add 1s, 10s and 100s to a 4-digit number • Add up to two 4-digit numbers • Add decimal numbers in the context of money • Add fractions and mixed numbers with the same denominator beyond 1 whole	• Add using mental strategies • Add whole numbers with more than 4 digits • Add decimals with up to 2 decimal places • Complements to 1 • Add fractions with denominators that are a multiple of one another	• Add integers up to 10 million • Add decimals with up to 3 decimal places • Order of operations • Negative numbers • Add fractions

Addition

Year 5	• Add whole numbers with more than 4 digits, including using formal written methods. • Add numbers mentally with increasingly large numbers. • Add decimals, including a mix of whole numbers and decimals, decimals with different numbers of decimal places, and complements of 1 • Add fractions with the same denominator, and denominators that are multiples of the same number.

Progression of skills	Key representations
Add using mental strategies Add 1s, 10s, 100s, etc. to any number. Use number bonds and related facts.	 $48,650 + 300 =$ $48,650 + 30,000 =$ $48,650 + 30 =$ To add ..., I can add ... then subtract ...
Add whole numbers with more than 4 digits Encourage children to estimate and use inverse operations to check answers to calculations.	I can exchange 10 ... for 1 ...

Addition

Progression of skills	Key representations
Add decimals with up to 2 decimal places Progress from the same number of decimal places to a different number of decimal places, and from no exchange to exchange.	I do/do not need to make an exchange because … I can exchange 10 … for 1 …

	O	Tth	Hth	Thth

$$\begin{array}{r} 1 \cdot 2\ 8\ 1 \\ +\ 2 \cdot 5\ 4 \\ \hline \cdot \end{array}$$

$$\begin{array}{r} 4 \cdot 4\ 5 \\ +\ 3 \cdot 2\ 1 \\ \hline \cdot \end{array}$$

Complements to 1

Pairs of numbers with up to 3 decimal places which total 1

Encourage children to make links with bonds to 10 and complements to 100 and 1,000

$0.3 + \boxed{} = 1$ $0.35 + \boxed{} = 1$

71 | 100

0.71 | 1

$4 + 6 = 10$

$44 + 56 = 100$

$444 + 556 = 1{,}000$

$0.4 + 0.6 = 1$

$0.44 + 0.56 = 1$

$0.444 + 0.556 = 1$

Addition

| Progression of skills	Key representations
Add fractions with denominators that are a multiple of one another Encourage children to convert fractions to the same denominator before adding. Progress from adding fractions within 1 whole to adding fractions beyond 1 whole.	The denominator has been multiplied by ... , so the numerator needs to be multiplied by... for the fractions to be equivalent. $\frac{1}{2} + \frac{1}{8} = \frac{4}{8} + \frac{1}{8} = \frac{5}{8}$ $\frac{1}{4} + \frac{3}{8} = \frac{2}{8} + \frac{3}{8} = \frac{5}{8}$ $\frac{3}{4} + \frac{5}{8} = \frac{6}{8} + \frac{5}{8} = \frac{11}{8} = 1\frac{3}{8}$
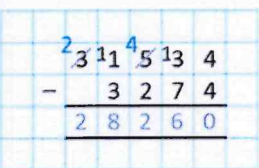

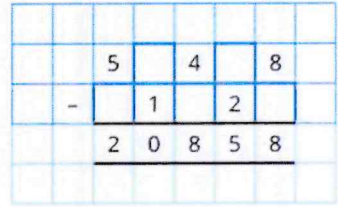

Progression of skills - Subtraction
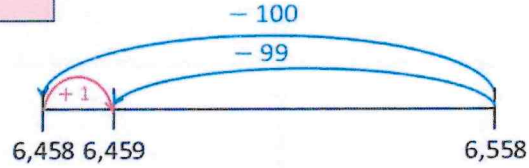

Year 4	Year 5	Year 6
• Subtract 1s, 10s, 100s and 1,000s from a 4-digit number	• Subtract whole numbers with more than 4 digits	• Subtract integers up to 10 million
• Subtract up to two 4-digit numbers	• Subtract using mental strategies	• Subtract decimals with up to 3 decimal places
• Subtract decimal numbers in the context of money	• Subtract decimals with up to 2 decimal places	• Order of operations
• Subtract fractions and mixed numbers with the same denominator	• Complements to 1	• Negative numbers
	• Subtract fractions with denominators that are a multiple of one another	• Subtract fractions

Subtraction
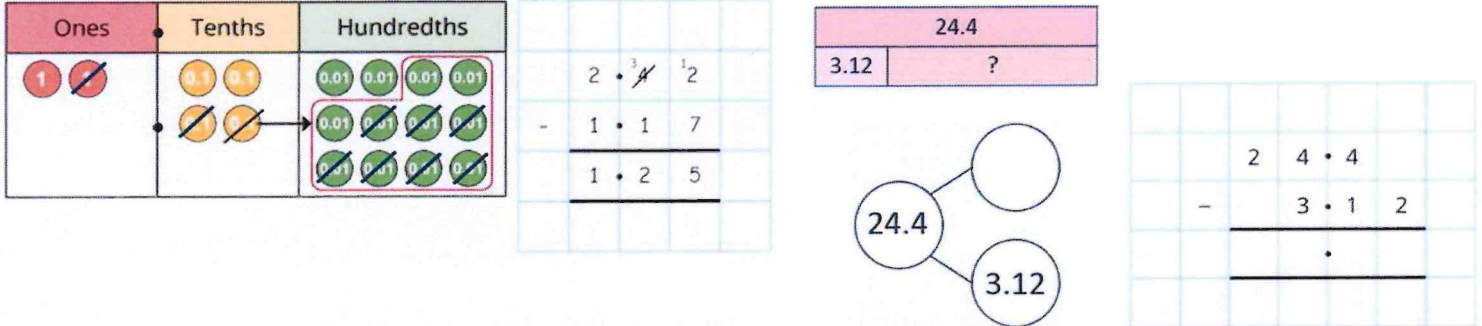

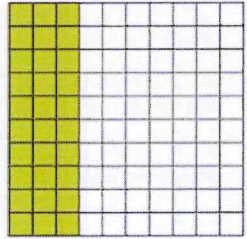

| Year 5	• Subtract whole numbers with more than 4 digits. • Subtract numbers mentally with increasingly large numbers. • Subtract decimals, including a mix of whole numbers and decimals, decimals with different numbers of decimal places, and complements of 1 • Subtract fractions with the same denominator, and denominators that are multiples of the same number.
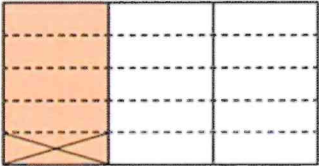

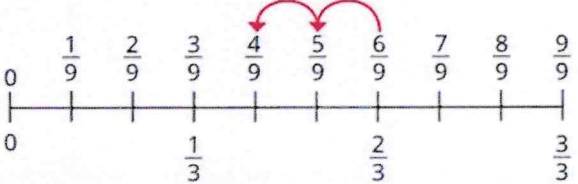

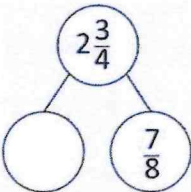

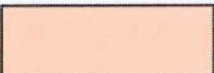

Progression of skills	Key representations
Subtract whole numbers with more than 4 digits Encourage children to estimate and use inverse operations to check answers to calculations.	I can exchange 1 ... for 10 ...
Subtract using mental strategies Subtract 1s, 10s, 100s etc from any number. Use number bonds and related facts.	 $48,650 - 300 =$ $48,650 - 30,000 =$ $48,650 - 30 =$ To subtract ..., I can subtract ... then add ...

Subtraction

Progression of skills	Key representations
Subtract decimals with up to 2 decimal places Progress from the same number of decimal places to a different number of decimal places and from no exchange to exchange.	
Complements to 1 Encourage children to make links with bonds to 10 and complements to 100 and 1,000 when finding a missing part or subtracting from 1	

$0.3 + \square = 1$ $0.35 + \square = 1$

$$10 - 4 = 6 \qquad 1 - 0.4 = 0.6$$
$$100 - 44 = 56 \qquad 1 - 0.44 = 0.56$$
$$1{,}000 - 444 = 556 \qquad 1 - 0.444 = 0.556$$

Subtraction

Progression of skills	Key representations
Subtract fractions with denominators that are a multiple of one another Convert fractions to the same denominator before subtracting. Progress from subtracting fractions within 1 whole to subtracting from a mixed number.	The denominator has been multiplied by … , so the numerator needs to be multiplied by… for the fractions to be equivalent. $$\frac{1}{3} - \frac{1}{15} = \frac{5}{15} - \frac{1}{15} = \frac{4}{15}$$ $$\frac{2}{3} - \frac{2}{9} = \frac{6}{9} - \frac{2}{9} = \frac{4}{9}$$
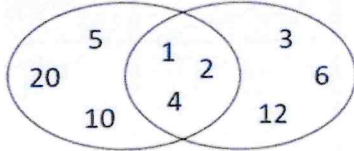

Progression of skills – Multiplication
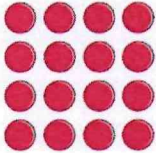

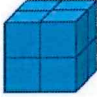

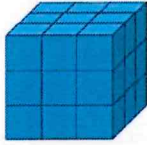

Year 4	Year 5	Year 6
• Times-table facts to 12 × 12 • Multiply by 1 and 0 • Multiply 3 numbers • Factor pairs • Multiply by 10 and 100 • Related facts • Mental strategies • Multiply a 2 or 3-digit number by a 1-digit number • Scaling • Correspondence problems	• Multiples and factors • Square and cube numbers • Multiply numbers up to 4 digits by a 1-digit number • Multiply numbers up to 4 digits by a 2-digit number • Multiply by 10, 100 and 1,000 • Mental strategies • Multiply fractions by a whole number • Multiply mixed numbers by a whole number • Find the whole	• Multiply numbers up to 4 digits by a 2-digit number • Multiply by 10, 100 and 1,000 • Order of operations • Multiply decimals by integers • Multiply fractions by fractions • Find the whole • Calculations involving ratio

Multiplication

Year 5	• Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers
	• Recognise and use square numbers and cube numbers, and the notation for squared (^{2}) and cubed (^{3})
	• Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers.
	• Multiply numbers mentally drawing upon known facts.
	• Multiply whole numbers and those involving decimals by 10, 100 and 1000
	• Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.
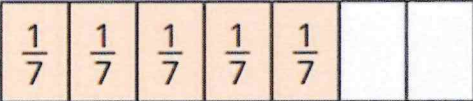

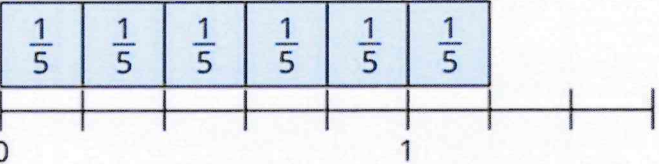

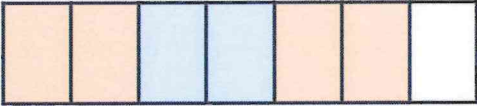

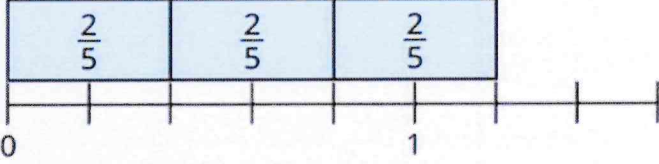

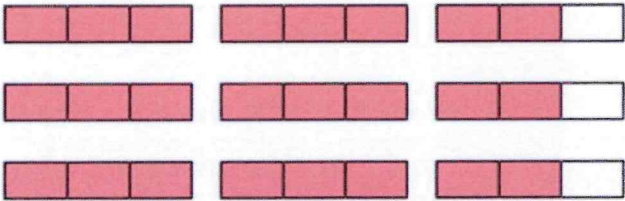

Progression of skills	Key representations		
Multiples and factors Encourage children to notice patterns and make links with known facts.	... is a multiple of ... because ... × ... = ... *[hundred square grid 1–30]*	... is a factor of ... because ... × ... = ... 1 × 8 2 × 4 1, 2, 4 and 8 are factors of 8	The common factors of ... and ... are ... Factors of 20 Factors of 12 *[Venn diagram: 20, 5, 10 / 1, 2, 4 / 3, 6, 12]*
Square and cube numbers	... squared means ... × ... 1 × 1 2 × 2 3 × 3 4 × 4 $1^2 = 1$ $2^2 = 4$ $3^2 = 9$ $4^2 = 16$		... cubed means ... × ... × ... 1 × 1 × 1 2 × 2 × 2 3 × 3 × 3 $1^3 = 1$ $2^3 = 8$ $3^3 = 27$

Multiplication

Progression of skills	Key representations
Multiply numbers up to 4 digits by a 1-digit number This builds on the short multiplication method introduced in Y4	To multiply a 4-digit number by … , I multiply the ones by … , the tens by … , the hundreds by … and the thousands by …

Multiply numbers up to 4 digits by a 2-digit number Numbers are first partitioned using an area model then long multiplication is introduced for the first time.	I can partition … into … and … $32 \times 44 = 1{,}200 + 80 + 120 + 8$ $32 \times 44 = 1{,}408$	First, I multiply by the … Then I multiply by the … $300 + 90 + 20 + 6 = 416$

Multiplication

Multiplication

White Rose MATHS

| Progression of skills	Key representations
Multiply by 10, 100 and 1,000 Some children may over-generalise that multiplying by a power of 10 always results in adding zeros. This will cause issues later when multiplying decimals.	To multiply by 10/100/1,000, I move all the digits … places to the left. … is 10/100/1,000 times the size of … | M	HTh	TTh	Th	H	T	O | | Th	H	T	O . Tth	Hth | $234 \times 10 = 2,340$ $234 \times 100 = 23,400$ $234 \times 1,000 = 234,000$ $2.34 \times 10 = 23.4$ $2.34 \times 100 = 234$ $2.34 \times 1,000 = 2,340$
Mental strategies Children continue to use efficient mental strategies such as partitioning and knowledge of factor pairs and related facts to multiply.	The most efficient strategy to calculate … × … is … To calculate … × 12, I can do … × … × … For example: 121×12 I could calculate 100×12 plus 20×12 plus 1×12 I could calculate 121×10 plus 121×2 I could calculate $121 \times 6 \times 2$ I could calculate $121 \times 4 \times 3$

©White Rose Education 2024

Multiplication

Progression of skills	Key representations
Multiply fractions by a whole number Make links with repeated addition. E.g. $\frac{1}{5} \times 4 = \frac{1}{5} + \frac{1}{5} + \frac{1}{5} + \frac{1}{5}$	To multiply a fraction by an integer, I multiply the numerator by the integer and the denominator remains the same. $\frac{1}{7} \times 5 = \frac{1}{7} + \frac{1}{7} + \frac{1}{7} + \frac{1}{7} + \frac{1}{7} = \frac{5}{7}$ $\frac{2}{7} \times 3 = \frac{2}{7} + \frac{2}{7} + \frac{2}{7} = \frac{6}{7}$ $\frac{1}{5} \times 6 = \frac{6}{5} = 1\frac{1}{5}$ $\frac{2}{5} \times 3 = \frac{6}{5} = 1\frac{1}{5}$
Multiply mixed numbers by a whole number	I can partition $\boxed{}\frac{\boxed{}}{\boxed{}}$ into $\boxed{}$ and $\frac{\boxed{}}{\boxed{}}$ $2\frac{2}{3} \times 3$ $2 \times 3 = 6$ $\frac{2}{3} \times 3 = \frac{6}{3} = 2$ $2\frac{2}{3} \times 3 = 6 + 2 = 8$
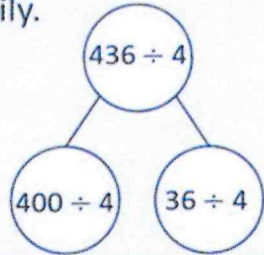

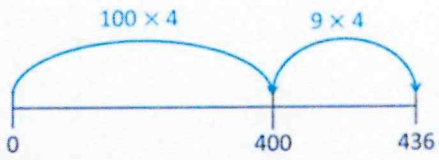

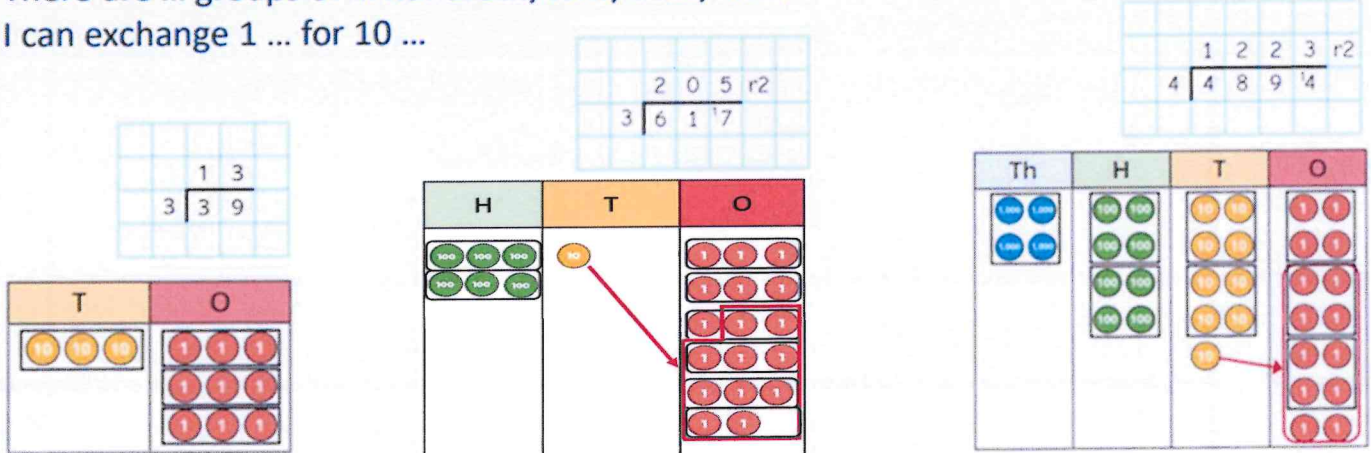

Multiplication

Progression of skills	Key representations	
Find the whole Children multiply to find the whole from a given part.	If $\dfrac{1}{\square}$ is ... , then the whole is ... $\times$ ... $\dfrac{1}{5}$ of __ = 6 $5 \times 6 = 30$ $\dfrac{1}{5}$ of **30** = 6	If $\dfrac{\square}{\square}$ is ... , then $\dfrac{1}{\square}$ is ... and the whole is ... $\times$ ... $\dfrac{4}{7}$ of __ = 24 $\dfrac{1}{7} = 24 \div 4 = 6$ $7 \times 6 = 42$ $\dfrac{4}{7}$ of **42** = 24

Progression of skills – Division

Year 4	Year 5	Year 6
• Division facts to 12 × 12 • Divide a number by 1 and itself • Related facts • Divide a 2 or 3-digit number by a 1-digit number • Divide by 10 and 100	• Mental strategies • Divide numbers up to 4 digits by a 1-digit number • Divide by 10, 100 and 1,000 • Fraction of an amount	• Short division • Mental strategies • Long division • Order of operations • Divide by 10, 100 and 1,000 • Divide decimals by integers • Decimal and fraction equivalents • Divide a fraction by an integer • Fraction of an amount • Calculate percentages • Calculations involving ratio

Division

Year 5	• Divide numbers mentally drawing upon known facts. • Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context. • Divide whole numbers and those involving decimals by 10, 100 and 1,000
Progression of skills	**Key representations**
Mental strategies	I can partition ... into ... and ... to help me to divide more easily. $436 \div 4$ $400 \div 4$ $36 \div 4$	I can show groups of ... on a number line. 100×4 9×4 0 400 436	To divide by ..., I can divide by ... and then divide the result by ... $436 \div 4 = 436 \div 2 \div 2$ $436 \div 2 = 218$ $218 \div 2 = 109$
Divide numbers up to 4 digits by a 1-digit number	There are ... groups of ... hundreds/tens/ones/ in ... I can exchange 1 ... for 10 ...		

Division

Progression of skills	Key representations
Divide by 10, 100 and 1,000 Encourage children to notice that dividing by 100 is the same as dividing by 10 twice, and that dividing by 1,000 is the same as dividing by 10 three times.	To divide by 10/100/1,000, I move all the digits … places to the right. … is one-tenth/one-hundredth/one-thousandth the size of … | Th	H	T	O	Tth	Hth | | Th	H	T	O	Tth	Hth	$120 \div 10 = 12$ | Th	H	T	O	Tth	Hth	$120 \div 100 = 1.2$ | Th	H	T	O	Tth	Hth	$120 \div 1{,}000 = 0.12$

Fraction of an amount		
Fraction of an amount Bar models support children to understand that to find a fraction of an amount, we divide by the denominator and multiply by the numerator.	To find $\dfrac{\square}{\square}$ of … , I need to divide by … and multiply by … $\dfrac{1}{5}$ of $20 =$ $\dfrac{3}{5}$ of $20 =$ $\dfrac{1}{4}$ of $84 =$ $\dfrac{3}{4}$ of $84 =$	If $\dfrac{1}{\square}$ is … , then the whole is … × … ? | 6	6	6	6	6 | $\dfrac{1}{5}$ of ___ $= 6$? 24 $\dfrac{4}{7}$ of ___ $= 24$
